

ENERGY TECHNOLOGIES FOR SUSTAINABLE BUILDINGS
A Technical Dialogue

Friday, March 3, 2006

7:30 am – Noon

**Robson Square Conference Centre
800 Robson Street, Vancouver**

This workshop will discuss the need for sustainable energy technologies in the emerging market for sustainable buildings.

The focus will be on three fundamental questions:

- What are the needs from a customer perspective?
- How and to what extent are those needs met by local suppliers?
- What role is the government playing in helping these markets to develop?

To answer these questions, the workshop brings together three groups: those involved in the planning and design of buildings such as developers, engineers, architects; those that supply energy-related technologies into this market and those that influence the market by way of regulations, building codes, by-laws and incentives.

COST: Members \$50.00 / Non-Members \$75.00 (plus GST)

ENERGY TECHNOLOGIES FOR SUSTAINABLE BUILDINGS

A Technical Dialogue

AGENDA

7:30 – 8:00 **Registration & breakfast**

8:00 – 8:05 **Introductory Remarks**

8:05 – 9:15 **Policy Drivers & Directions**

The three levels of government will discuss their respective roles in encouraging sustainable building designs through policy drivers, programs, incentives, regulations and by-laws. BC Hydro will discuss the important role of PowerSmart in achieving these goals.

9:15 – 10:25 **Development & Design**

Developers, architects and engineers will speak to the true challenges of sustainable design in today's market, and the role that sustainable energy technologies may play in pushing the limit of green buildings.

10:25 – 10:40 **Coffee Break**

10:40 – 11:50 **Technology Solutions**

Technology suppliers that have commercial products ready today will talk of their experiences of providing solutions to the local market, and what may be done to enhance their local sales.

11:50 – 12:00 **Summary and Closing remarks**
